

Dalby celebrates 150 years *remembering years gone by.....*

Dalby Engine Rebuilders

a driving force in local business

Not many businesses can say they've gone back to their founding roots and mean it, like Dalby Engine

Rebuilders.

After 55 years in business, the team is at their original Loudoun Rd location where it all began in 1958.

While the look has changed from the original tin shed, relocating their downtown shop several years ago, merging the spare parts and workshop divisions under one roof has strengthened the company's core principles - providing quality service and parts to the customers. Customers can speak with our technical team from both divisions to get expert advice on their engine.

Dalby Engine Rebuilders has always

been a family owned and orientated business, believing that by staying privately owned they gain greater clientele knowledge to better serve Dalby and district.

Brian and Merle Meyers co-founded the business in 1958 and continue to have a strong influence in the business.

Along with their children Michael and Catherine they continue to grow the business by listening and reacting to the market and their customers.

"I am very proud of the business my parents built, which has always offered a good mix of product and expertise.

The strength of the business is our people who are extremely knowledgeable and provide exceptional service," Catherine said.

Our spare parts showroom stocks a

comprehensive range of parts covering the entire vehicle from bumper to bumper. We have parts to suit most passenger, commercial, truck, agricultural and heavy earthmoving machinery for petrol, light and heavy diesel engine application. We also offer a large range of industrial equipment and supplies. Spare parts manager Geoff Bradley and his team have well over 100 years industry experience between them and this knowledge ensures customers receive exceptional service.

With great staff and a strong community focus, Dalby Engine Rebuilders will continue to serve the district and are proud to be part of the 150 year Dalby Celebrations.

Engine Rebuilders (Sales) Pty. Ltd. building which will be officially opened by the Minister for Development and Industrial Affairs (Mr. F. A. Campbell) on Wednesday. One of the main features is the covered "drive-in" for customers along the left side of the building.

It was in this building that Dalby Engine Rebuilders commenced operations in 1958. Extensions have been added on two occasions since then.

Dalby Engine Rebuilders has always been a family owned and orientated business, believing that by staying privately owned they gain greater clientele knowledge to better serve Dalby and district.
